API End Points

Language: Python
Framework: FastApi

Designation End Points

GET /**designation/designations/** Get All Designations

This method will return all Designations

POST /**designation/designations/** Create a Designation

This method will create a new Designation

PUT /**designation/designations/{designation_id}** Update a Designation

This method will update an existing Designation

DELETE /**designation/designations/{designation_id}** Delete a Designation

This method will delete a Designation

GET /**designation/designations/{designation_id}** Get Designation by ID

This method will return a Designation by ID

GET /**designation/designations/name/{title}** Get Designation by Title

This method will return a Designation by title

Companies End Points

GET

/company/companies/ Get All Companies

This method will return all Companies

POST

/company/companies/ Create a Company

This method will create a new Company

GET

/company/companies/{company_id} Get Company by ID

This method will return a Company by ID

PUT

/company/companies/{company_id} Update a Company

This method will update an existing Company

DELETE

/company/companies/{company_id} Delete a Company

This method will delete a Company

GET

/company/companies/name/{company_name} Get Company by Name

This method will return a Company by name

Teams End Points

GET	/team/teams/	Get All Teams	  
This method will return all Teams			
POST	/team/teams/	Create a Team	 
This method will create a new Team			
PUT	/team/teams/{team_id}	Update a Team	 
This method will update an existing Team			
DELETE	/team/teams/{team_id}	Delete a Team	 
This method will delete a Team			
GET	/team/teams/id/{team_id}	Get Team by ID	 
This method will return a Team by ID			
GET	/team/teams/title/{team_title}	Get Team by Title	  
This method will return a Team by title			

Customers End Points

GET

/customer/customers/ Get All Customers

This method will return all Customers

POST

/customer/customers/ Create a Customer

This method will create a new Customer

PUT

/customer/customers/{customer_id} Update a Customer

This method will update an existing Customer

DELETE

/customer/customers/{customer_id} Delete a Customer

This method will delete a Customer

GET

/customer/customers/{customer_id} Get Customer by ID

This method will return a Customer by ID

GET

/customer/customers/name/{customer_name} Get Customer by Name

This method will return a Customer by name

DocVault End Points

GET /docvault/docvault/ Get all DocVault entries

Retrieves all DocVault entries from the database.

POST /docvault/docvault/ Create a new DocVault entry

Creates a new DocVault entry in the database.

GET /docvault/docvault/{docvault_id} Get DocVault by ID

Retrieves a DocVault entry from the database by ID.

PUT /docvault/docvault/{docvault_id} Update DocVault by ID

Updates a DocVault entry in the database by ID.

DELETE /docvault/docvault/{docvault_id} Delete DocVault by ID

Deletes a DocVault entry from the database by ID.

GET /docvault/docvault/filename/{docvault_file_name} Get DocVault by file name

Retrieves a DocVault entry from the database by file name.

Opportunity End Points

POST

/opportunity/Opportunity/ Create a new Opportunity entry

Creates a new Opportunity entry in the database.

GET

/opportunity/Opportunity/{tenant_id} Get all Opportunity entries

Retrieves all Opportunity entries from the database.

GET

/opportunity/Opportunity/{tenant_id}/id/{Opportunity_id} Get Opportunity by ID

Retrieves a Opportunity entry from the database by ID.

PUT

/opportunity/Opportunity/{tenant_id}/id/{Opportunity_id} Update Opportunity by ID

Updates a Opportunity entry in the database by ID.

DELETE

/opportunity/Opportunity/{tenant_id}/id/{Opportunity_id} Delete Opportunity by ID

Deletes a Opportunity entry from the database by ID.

GET

/opportunity/Opportunity/{tenant_id}/title/{Opportunity_title} Get Opportunity by title

Retrieves a Opportunity entry from the database by title.

Rfx End Points

POST

/rfx/rfx/

Create a new RFX record

Create a new RFX record with the provided details.

GET

/rfx/rfx/{tenant_id}

Get all RFX records

Retrieve a list of all existing RFX records.

GET

/rfx/rfx/id/{rfx_id}

Get an RFX by ID

Retrieve an RFX record by its unique identifier.

PUT

/rfx/rfx/id/{rfx_id}

Update an RFX by ID

Update an existing RFX record by its unique identifier.

DELETE

/rfx/rfx/id/{rfx_id}

Delete an RFX by ID

Delete an existing RFX record by its unique identifier.

GET

/rfx/rfx/{tenant_id}/initiator/{initiator_id}

Get RFXs by initiator ID

Retrieve a list of RFX records by the initiator's ID.

GET

/rfx/rfx/{tenant_id}/title/{rfx_title}

Get an RFX by title

Retrieve an RFX record by its title.

GET

/rfx/rfx/{tenant_id}/number/{rfx_number} Get an RFX by number

Retrieve an RFX record by its unique number.

Rfx Stages End Points

GET

/rfx_stage_detail_stage/rfx_stage_details/ Get All RfxStageDetails

This method will return all RfxStageDetails

POST

/rfx_stage_detail_stage/rfx_stage_details/ Create RfxStageDetail

This method will create a new RfxStageDetail

PUT

/rfx_stage_detail_stage/rfx_stage_details/{rfx_stage_detail_id} Update RfxStageDetail

This method will update an existing RfxStageDetail

DELETE

/rfx_stage_detail_stage/rfx_stage_details/{rfx_stage_detail_id} Delete RfxStageDetail

This method will delete an existing RfxStageDetail

GET

/rfx_stage_detail_stage/rfx_stage_details/{rfx_stage_detail_id} Get RfxStageDetail by ID

This method will return a RfxStageDetail by ID

GET

/rfx_stage_detail_stage/rfx_stage_details/status/{status} Get RfxStageDetails by Status

This method will return RfxStageDetails by Status

Rfx Clarification End Points

POST /rfx_clarification/rfx-clarifications/ Create RFX Clarification

This method will create a new RFX Clarification

GET /rfx_clarification/rfx-clarifications/rfx/{rfx_id} Get All RFX Clarifications by RFX ID

This method will return all RFX Clarifications by RFX ID

GET /rfx_clarification/rfx-clarifications/id/{clarification_id} Get RFX Clarification by ID

This method will return a RFX Clarification by ID

PUT /rfx_clarification/rfx-clarifications/id/{clarification_id} Update RFX Clarification

This method will update an existing RFX Clarification

DELETE /rfx_clarification/rfx-clarifications/id/{clarification_id} Delete RFX Clarification

This method will delete a RFX Clarification

GET /rfx_clarification/rfx-clarifications/type/{clarification_type} Get RFX Clarifications by Type

This method will return RFX Clarifications by Type

GET /rfx_clarification/rfx-clarifications/status/{status} Get RFX Clarifications by Status

This method will return RFX Clarifications by Status

GET

/rfx_clarification/rfx-clarifications/title/{clarification_title} Get RFX Clarifications by Title

This method will return RFX Clarifications by Title

GET

/rfx_clarification/rfx-clarifications/ref-num/{rfx_clarification_ref_num} Get RFX Clarification by Reference Number

This method will return a RFX Clarification by Reference Number

Rfx Clarification Post End Points

POST	/rfx_clarification_post/rfx-clarification-posts/	Create Rfx Clarification Post	 
Create a new Rfx Clarification Post			
GET	/rfx_clarification_post/rfx_clarification_posts/clarification/{rfx_clarification_id}	Get All Rfx Clarification Posts by Clarification ID	 
Retrieve a list of all Rfx Clarification Posts by Clarification ID.			
GET	/rfx_clarification_post/rfx-clarification-posts/id/{post_id}	Get Rfx Clarification Post by ID	 
Get a Rfx Clarification Post by its ID			
PUT	/rfx_clarification_post/rfx-clarification-posts/id/{post_id}	Update Rfx Clarification Post	 
Update an existing Rfx Clarification Post			
DELETE	/rfx_clarification_post/rfx-clarification-posts/id/{post_id}	Delete Rfx Clarification Post	 
Delete a Rfx Clarification Post by its ID			

Rfx Clarification Meta End Points

POST /rfx_clarification_meta/rfx-clarification-meta/ Create Rfx Clarification Meta

This method will create a new Rfx Clarification Meta

GET /rfx_clarification_meta/rfx-clarification-meta/clarification/{rfx_clarification_id}

Get All Rfx Clarification Meta

This method will return all Rfx Clarification Meta by Clarification ID

PUT /rfx_clarification_meta/rfx-clarification-meta/id/{rfx_clarification_meta_id} Update Rfx Clarification Meta

This method will update an existing Rfx Clarification Meta

DELETE /rfx_clarification_meta/rfx-clarification-meta/id/{rfx_clarification_meta_id} Delete Rfx Clarification Meta

This method will delete an existing Rfx Clarification Meta

GET /rfx_clarification_meta/rfx-clarification-meta/id/{rfx_clarification_meta_id} Get Rfx Clarification Meta by ID

This method will return a Rfx Clarification Meta by ID

GET /rfx_clarification_meta/rfx-clarification-meta/post/{rfx_clarification_post_id} Get All Rfx Clarification Meta by Post ID

This method will return All Rfx Clarification Meta by Clarification Post ID

GET /rfx_clarification_meta/rfx-clarification-meta/clarificaton/{rfx_clarification_id}/meta/{meta_key} Get All Rfx Clarification Meta by ID & Key

This method will return All Rfx Clarification Meta by Clarification ID and a Key (contact/docvalt)

GET

/rfx_clarification_meta/rfx-clarification-meta/clarificaton
/{rfx_clarification_id}/post/{rfx_clarification_post_id}/meta/{meta_key}

Get All Rfx Clarification Meta by Post ID &
Key

This method will return All Rfx Clarification Meta by Clarification ID, Post ID and a Key (contact/docvalt)

Bid Documents End Points

POST `/bid_documents/bid-documents/` Create a Bid Document

This method will create a new Bid Document

GET `/bid_documents/bid-documents/rfx/{rfx_id}` Get All Bid Documents by RFX

This method will return all Bid Documents by RFX ID

PUT `/bid_documents/bid-documents/id/{bid_documents_id}` Update a Bid Document

This method will update an existing Bid Document

DELETE `/bid_documents/bid-documents/id/{bid_documents_id}` Delete a Bid Document

This method will delete a Bid Document

GET `/bid_documents/bid-documents/id/{bid_documents_id}` Get Bid Document by ID

This method will return a Bid Document by ID

GET `/bid_documents/bid-documents/title/{title}` Get Bid Document by Title

This method will return a Bid Document by title

GET `/bid_documents/bid-documents/status/{status}` Get Bid Document by Bid Status

This method will return All Bid Document by Bid Status

Bid Document Post End Points

POST /bid_documents_post/bid-documents-post/ Create a Bid Document Post

This method will create a new Bid Document Post

GET /bid_documents_post/bid-documents-post/bid-document/{bid_documents_id} Get All Bid Document Posts

This method will return all Bid Document Posts by Bid Document ID

PUT /bid_documents_post/bid-documents-post/id/{bid_documents_post_id} Update a Bid Document Post

This method will update an existing Bid Document Post

DELETE /bid_documents_post/bid-documents-post/id/{bid_documents_post_id} Delete a Bid Document Post

This method will delete a Bid Document Post by ID

GET /bid_documents_post/bid-documents-post/id/{bid_documents_post_id} Get Bid Document Post by ID

This method will return a Bid Document Post by ID

Bid Clarifications End Points
